

ENDOWMENT

- 1x — Unit BE-28T
- 2x — Wires for electrodes connection
- 4x — Self-adhering electrodes, with 2 mm socket connection
- 2x — Alkaline batteries AA 1.5 V (LR6)
- 1x — Instructions booklet
- 1x — Stuffed bag with compartments

TECHNICAL SPECIFICATIONS

Supply: 2 alkaline batteries
1,5 V AA (LR6)

Output: Maximum 130
mA across 500 Ohm load

Pulse Width: From 50µS to
250µS adjustable in steps of 10µS

Pulse rate: From 1Hz to 150Hz
(1-2-3-4-5-10-12-14-16-18-20-25-
30-35-40-45-50-60-70-80-90-100-
110-120-130-140-150)

Waveform: Symmetrical Bi-phasic
rectangular - Asymmetrical Bi-
phasic rectangular - Mono-phasic
rectangular

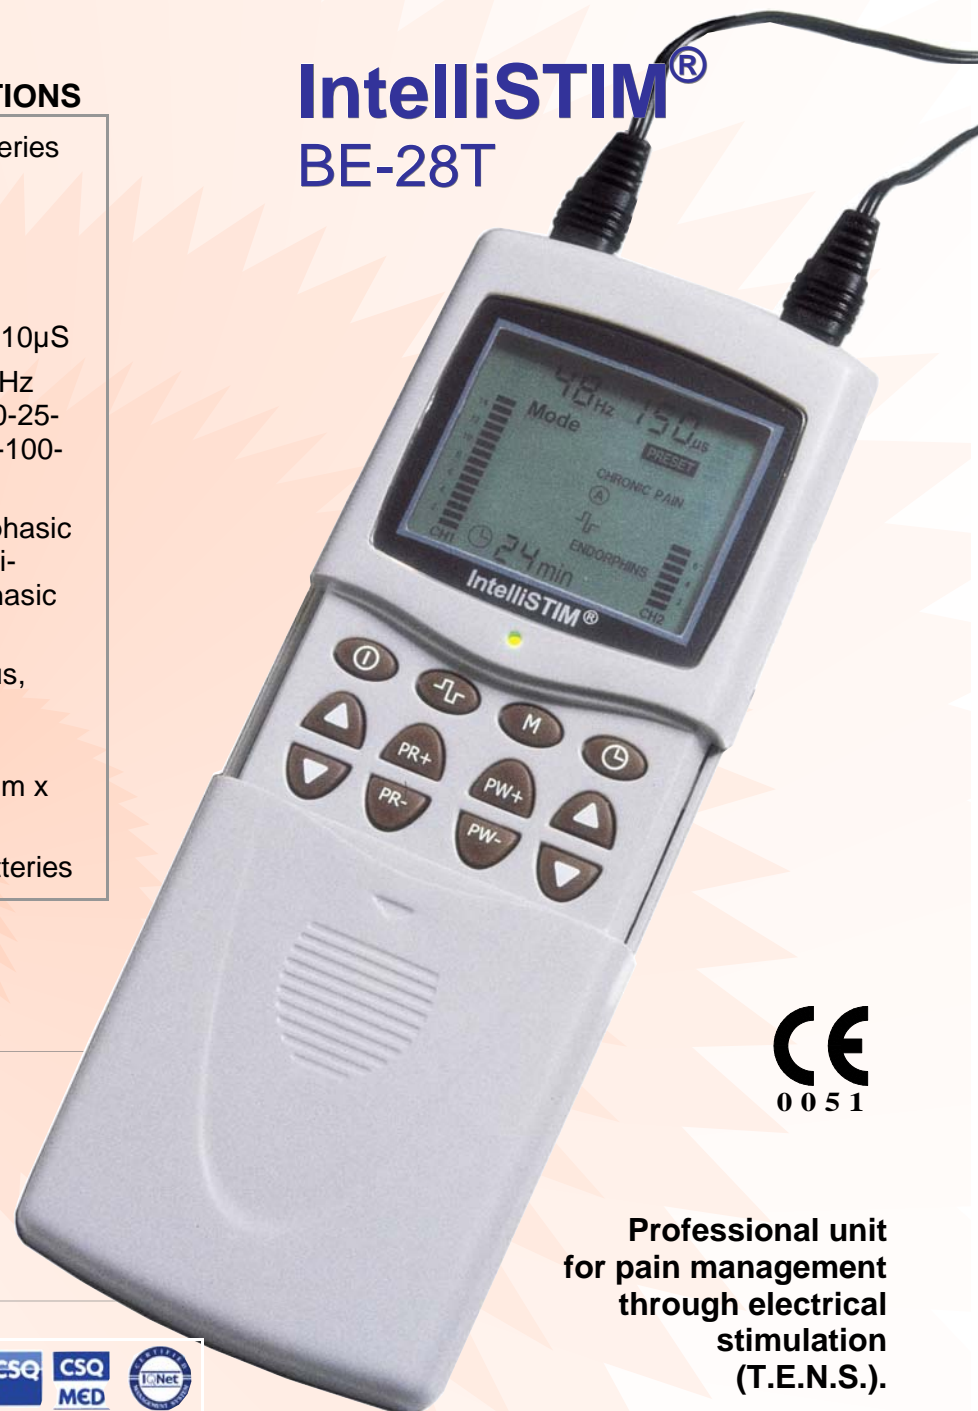

Treatment Timer: Continuous,
15min, 30min, 45min, 60min,
90min.

Dimensions: 138mm x 68mm x
28mm

Weight : 160 g. including batteries

WARNINGS!

BE-28T is a medical device CE.
Carefully read the warnings and the instructions for
use. The unit cannot be used: - on patients with car-
diac pacemakers; - on pregnant women - on areas
affected by inflammatory processes.

Professional unit
for pain management
through electrical
stimulation
(T.E.N.S.).

Since 1981...Hardware & Software for Rehabilitation

We exactly know what you expect by a professional analgesic unit...

...and we developed...

By a modern analgesic electrical stimulation unit (T.E.N.S.) a professional user expects that it is: **effective** (for achieving therapeutic aims), **easy to operate** (for avoiding the user to waste his time), **flexible** (for allowing to treat any pain situation), **robust** (to resist for long time). Further to the above, **IntelliSTIM® BE-28T** also offers:

- 6 **Large LCD display**
- 6 **Intuitive Operation**
- 6 **9 operating programs (editable)**
- 6 **any parameters shown**
- 6 **“edit & feel” function**
- 6 **ACUTE and CHRONIC pain protocols**
- 6 **3 Selectable wave shapes**

IntelliSTIM® BE-28T

Professional unit for pain management.

- **Dual intensity-independent channels**
- **Last used program loading**
- **Count-down timer with switch-off at the end**
- **Auto-switch-off if not in use**
- **Accumulative recording of the treatment time (in hours)**
- **Electrodes protection circuit (just in the model BE-28TC)**
- **Lock function**

**ENDORPHINS or
“Gate –Control”?**

Among the other parameters, on the display, it is also shown the applied analgesic technique, according to the set-up of the unit.
