MSD-LF Band - 1,50m or 5,50m length band

Our MSD Latex Free Band has the same texture, feel and stretch as latex. These bands are less sensitive to sunlight and heat which causes breakage.

Using the MSD Latex Free Band for resistive exercise provides positive as well as negative force on the muscles and improves the range of motion, the strength and the cooperation of the muscle groups.

The different resistance levels are determined by thickness of the band. Our MSD LF Band increases in difficulty from yellow to black.

These Latex Free Bands are available in 5,50m length rolls and are packed in a nice looking color-coded dispenser packaging.

Our high quality MSD-LF Band is also available in a 1,50m band set, packed in a nice polybag with header for easy dispensing.
