

## HYDROLIFT™

Whitehall, the leader in hydrotherapy equipment since 1946 presents the fully adjustable Hydrolift™. The Hydrolift™ is essentially two whirlpools in one, allowing you to treat lower and upper extremities with the same unit. Hydrolift™ would be a valuable addition to any practice where hydrotherapy treatment is utilized.

The Whitehall Hydrolift™ is constructed of heavy gage tubular stainless steel. By using the convenient turn handle, the Hydrolift™ will raise the whirlpool to any height up to 3 feet off the floor (measured from the rim). In addition, the Hydrolift™ easily clamps onto Whitehall's P-(podiatry) 10-M, P-15-M or P-22-M and our E-(Extremity) 15-M or E-22-M whirlpools to give total retrofit capabilities. Tamper resistant clamps secure the Hydrolift™ to the whirlpool for added safety. Whitehall's whirlpools are constructed of heavy gage type 304 stainless steel, polished to a satin finish. Tank bottoms are a seamless covered design that minimizes bacterial build-up. All whirlpools come standard with a powerful 1/2 horsepower turbine motor.

### FEATURES:

- Powerful 1/2 horsepower turbine motor
- Variable pressure control valve
- The fully adjustable Hydrolift™ lets you treat upper and lower extremities with the same unit
- Locking swivel type casters
- Turn handle raises the whirlpool quickly and easily, even when completely filled
- Integral lock secures whirlpool safely into position
- Hydrolift™ is constructed of heavy gage tubular stainless steel
- Tamper resistant clamps secure the Hydrolift™ to the whirlpool for added safety
- The Hydrolift™ easily clamps onto our P-10-M, P-15-M, P-22-M, E-15-M or E-22-M whirlpools to give total retrofit capabilities
- All Whitehall whirlpools have seamless covered bottoms to minimize bacterial build-up
- Hydrolift™'s unique design eliminates bulky external legs, wheels and other obstacles that can hinder patient treatment
